<b>8.2.2</b>	<b>Personal protective equipment</b>	
	Eye/face protection	Use equipment for eye protection tested and approved under appropriate government standard such as NIOSH (US) or EN 166(EU)
	Skin/Hand protection	Handle with compatible chemical-resistant gloves. Gloves must be inspected prior to use. Use proper glove removal technique (without touching glove's outer surface) to avoid skin contact with the product. Dispose of contaminated gloves after use in accordance with applicable laws and food laboratory practices. Wash and dry hands.
	Body Protection	The type of protective equipment must be selected according to the concentration and amount of the dangerous substance at the specific workplace
	Respiratory protection	Where risk assessment shows air-purifying respirators are appropriate use a full-face respirator with multi-purpose combination (US) or type ABEK(EN 14387) respirator cartridge as a backup to engineering controls. If respirator is the sole means of protection, use a full-face supplied air respirator. Use respirators and components tested and approved under appropriate government standard such as NIOSH (US) or CEN (EU).
	Control of environmental exposure	Prevent further leakage or spillage if safe to do so. Do not let product enter drains. Discharge into the environment must be avoided.
